PRELIMINARY AMENDMENT

Preliminarily, please amend this application as follows:

1. (Amended) An anchor for securing a suture to bone, comprising:

an elongated body having a proximal region terminating in a proximal end, and a distal region [with a successively narrower cross-section] terminating in a distal end [to facilitate] configured for insertion into a hole [drilled] in the bone;

[means, disposed in] said proximal region[, for engaging] including an element configured for positive axial interengagement with a corresponding element of a driver for insertion of said anchor into the [drilled] hole;

at least one ridge, disposed [about the] on an exterior surface of said body, for engaging the bone after insertion to resist withdrawal of said anchor; and

Date of Deposit April 11, 1996
I hereby certify under 37 CFR 1.8(a) that this correspondence is being deposited with the United States Postal Service as first class mail with sufficient postage on the date indicated above and is addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.
